Final Project Proposal

Casey Colley   Robert Detjens   Lyell Read

Winter 2022 - CS427 Cryptography

Summary

Briefly summarize your project topic. Feel free to share any reasons for your personal interest in this topic (i.e., it involves an application of cryptography to my life's passion).

Provable Security

In case it's not totally obvious, please justify the project's relationship to cryptography and specifically *provable security*.

Division of Labor

List the team members and proposed division of effort

Team Member	Responsibility
Casey Colley	
Robert Detjens	
Lyell Read	

Justification

Justify the size of the team in terms of amount of work. Why is the project worth 25% of your grade?

Goals

How will you demonstrate in-depth understanding that goes beyond what was studied in class?

Deliverables

What deliverables will you provide?

- cock
- balls
- dick even

Project Impact

Will you be able to use this project as part of your portfolio? Will the project benefit a wider community (e.g., other students learning cryptography)?

Expectations

How should I judge whether your project gets a high grade?

Expected Resources

List resources/tools that you will likely use.
